1 IMMEDIATE CARE

After delivery make sure you water your plant until the soil is moist then check over the plant to make sure it is in good condition.

POSITION 2

- **Soil:** Fertile, moisture-retentive, well drained soil
- **Position:** They thrive in full sun, but there are some that tolerate shade
- **Planting:** Add plenty of organic matter when planting

3 PLANTING

It is important that you remove the plant from its nursery pot, so plant in a container or in the ground as soon as possible.

ESTABLISHING 4

Water the plants in small amounts regularly until established. The soil should be moist at all times, we recommend watering close to the base to ensure the roots are getting the needed water.

5 CARING

- In summer, feed frequently with fertiliser
- Prune depending on grouping
- Prune out and burn stems with signs of fungal disease
