1 IMMEDIATE CARE

After delivery make sure you water your plant until the soil is moist then check over the plant to make sure it is in good condition.

POSITION 2

- **Temperature:** Min. 7-10'c with high humidity
- **Position:** Bright spot out of direct sunlight

3 PLANTING

It is important that you remove the plant from its nursery pot, so plant in a container as soon as possible.

ESTABLISHING 4

Water the plants in small amounts regularly until established. The soil should be moist at all times, we recommend watering close to the base to ensure the roots are getting the needed water.

5 CARING

- During spring to early autumn, give a regular water and feed fortnightly with a high potash liquid feed.
- Over late autumn to early spring cut down on watering as the plant will be dormant.
- Shorten the previous years growth in early spring to allow new growth to shoot.
